The survey results will assist in determining what levels of symptoms and measurable outcomes should be considered adverse health effects, which the standards are intended to prevent. Overall, the project will benefit the Agency as it reviews and sets NAAQS for irritant gases such as ozone, nitrogen dioxide, and sulfur dioxide. The EPA will collect information regarding the significance of health effects resulting from exposure to irritant gases by surveying members of the American Thoracic Society. The survey results will be stored in an OAQPS computer database.

These procedures will go into effect upon publication of this notice in the **Federal Register**.

2. The International Bureau will approve special temporary authorization requests for international Section 214 authorization from applicants that have complied with Section 63.04 of the Commission's Rules, 47 CFR 63.04, through a Grant Stamp procedure.
